

Suma Special

Liquid mechanical ware washing detergent for medium hard water

L4

Description

Suma Special L4 is a concentrated liquid mechanical ware washing detergent specially formulated to provide excellent soil removal in soft to medium hard water conditions.

Key properties

Suma Special L4 is a heavy duty alkaline liquid detergent which is suitable for use in a wide range of single and multi-tank ware washing machines. It contains a blend of caustic alkali and powerful scale control agents, which will provide excellent removal of fats and stains. The powerful scale control agents will also prevent scaling in medium hard water conditions when used as directed.

Benefits

- Cuts through grease and dried-on food
- Being highly concentrated gives greater economy in use
- Prevents scaling of the dish wash machine in medium to hard water conditions

Use instructions

Suma Special L4 is normally applied using JohnsonDiversey automatic dispensing equipment. It can however be used in conjunction with integral dosing pumps where fitted. To ensure perfect cleaning results, dose at a concentration of 1 - 4 g/litre, depending on local site conditions. At 2 g/litre, this will prevent scaling in water containing up to 120 ppm CaCO₃.

At first use, rinse pump and transport tubes of the dosing system to avoid possible crystallisation in these tubes caused by mixing of products.

Technical data

Appearance	clear yellow liquid
pH neat	13.5
pH (1% solution)	12.7
Relative density	1.28

These figures are typical values and should not be interpreted as specifications.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.

Store in original container. Avoid extremes of temperatures.

Product compatibility

Under recommended conditions of use, **Suma Special L4** is suitable for use on most materials commonly encountered in the kitchen. Do not however use on alkali sensitive items such as copper, brass, aluminium or rubber.
